THE MARKETS

Wall Street Review.

Wall Street Review.

New York, May 27.—Today's stock market was an irregular drift over a fractional range for the most part below yesterday's closing level. There were a few exceptions among minor stocks. The recent demand for Wisconsin Central stocks continued, accompanied by rumors of buying for control. There was an upward movement in Sugar when the report reached Wall street of a conference of senators to attempt an agreement upon Cuban reciprocity; but the stock dropped back when the conference adjourned without action. A rise of nearly two points in American Locomotive seemed a supplement to that of yesterday in the car stocks. Pressed Steel Car reacted sharply over three points on the emphatic denial of yesterday's rumors of a merger with the American Car company. Canadian Pacific continued by far the most active stock in the list. It dropped sharply 2½ in the first few minutes of trading, but was railled by arbitrage buying from Canadian centers where the absorption of the stock continued at figures above the New York level. The reaction was considered a result of the speculation which has followed the rise, but the conviction remains in Wall street that important developments are pending in the property. The absence of developments in the coal strike situation did not prevent the repressive influence exercised by the increasing scarcity of coal and the growing effect on other industries. The government's weekly crop builetin may have had some unfavorable effect because of the delay to seeding of the corn crop reported. A batch of favorable railroad earnings, including the net showing for April of a number of important systems and good increases in gross earnings for the third week in May of others was without apparent effect in the market. Total sales, 307,800 shares. The bond market was duli and irregular. Total sales, par value, \$1.-700,000. United States bonds were all unchanged on the last call.
